Subject: Peaker #1 lower crankline assessment & field install repair work order

Mr. Waters,

Thank you for allowing Fairbanks Morse to assist with your engine repairs. FM Houston has opened a shop work order for this project in anticipation of receiving the #1 Peaker engine from your plant. Our intent is to dedicate shop floor space and qualified technicians to disassemble the lower crankline for assessment and report. Upon agreement of repair, FM would commence with repair operations on this engine.

Costs for shop labor, parts and field labor to install engine (no machine repair of lower crankline): \$811,430.23

Recertified 12-cyl engine block: \$230,714.00

Please let us know if you have any questions or need clarifications on this project.

Best Regards

Bryce Gragg
